

Academic Cloud

The Academic Cloud - Services for Universities in Niedersachsen

In a digitalized world we all rely on a growing amount of services for education, work and recreation. Therefore it is essential that reliable, secure and trustworthy services exist for numerous user groups and a large variety of applications. The idea behind the Academic Cloud is to offer such services to students and employees of universities and higher education institutes in Niedersachsen, Germany.

Hosted in academic data centers according to German data protection and data security directives, the Academic Cloud supports studies and work with a growing digital service portfolio. The Academic Cloud is co-funded by the „Niedersächsisches Ministerium für Wissenschaft und Kultur“ [MWK](#). Planning and operation are supported by the [LANIT/HRZ](#), the forum of the university data centers in Niedersachsen.

The following services are available in the Academic Cloud:

Service	Software	Web Interface
Meet: Video conferencing	BigBlueButton	https://meet.gwdg.de/
