Process Management

At Jade University, the processes are mapped using the „Aeneis" product from Intellior. The university computing centre takes over the technical operation of the system. In terms of content, user facilities are responsible.

If you have any questions regarding the content of the process management software, please contact Department 3 - Section 3.1 - Quality Management and Organizational Development.

If you have any technical questions about the process management system, please write an e-mail to the university computing centre.
