

## Access via WebDAV

With aid of a WebDAV-Client (Web-based Distributed Authoring and Versioning), members of the university can access the files in the Collaboration Cloud of the Jade University in the **Data Manager**.

## Network System of Computers

If you work at a computer within the [network system of computers](#), you can call up theneeded software in the computing centre software menu. This way, you get comfortable access to the Collaboration Cloud within the file manager \* Computing centre software menu / Tools / WebDrive \* Username: [standard login](#) (form: ma1150) \* Password: <Your password> \* Select the entry "JADE-HS - Collaboration Cloud" in the server list \* Within the file manager, you will find the content of the Collaboration Cloud on drive W:\

## Operation Systems

### Apple macOS

Finder / Go to / Connect with server...

- Server Address: <https://ccs.jade-hs.de/remote.php/webdav/>
- Connect as registered user / Name: [standard login](#) (form: ma1150)
- Save password in keychain
- Site-Profile Name: JADE-HS - Collaboration Cloud (or short: JADE-HS - CC)

### Linux

Files / Type in Location

- Location: <davs://ccs.jade-hs.de/remote.php/webdav/>
- Username: [standard login](#) (form: ma1150)
- Password: <Your password>
- Optional: Never forget the password (password is saved in the local keychain)
- Optional: Add bookmark and rename into "JADE-HS - Collaboration Cloud" (or short: JADE-HS - CC)

### Microsoft Windows

Given that the WebDAV-client, which is contained in the operation system Microsoft Windows, unfortunately only works quite unsoundly, you need to install a WebDAV compatible software first and configure it. This is why the university computing centre acquired licenses for the WebDAV compatible software [WebDrive](#). You can find it in the [WebFiler](#) under

- JADE-HS - Daten (X:) / HRZ-Support / WebDrive

- here, you need to switch to the folder according to your operation system
- Microsoft Windows users should normally select the 64-bit Webdrive Client (webdrive64...exe)

After successful installation and restart of your computer, please configure it in the following way:

- Type of Server: Secure WebDAV
- URL / Address: <https://ccs.jade-hs.de/remote.php/webdav/>
- Username: [standard login](#) (form: ma1150)
- Password: <Your password>
- Further Settings:
  - General Settings / HTTP-Settings
    - Add a slash at the end of a directory list: Activated
  - General Settings / DAV:
    - Lock Owner Quality: <PC-Name> <Your name> (e.g. mo2xxxx Max Mustermann)
    - Activate automated DAV-Blocking: Active
  - File Settings / File:
    - Activate Change of Notes List (bottom): Active
  - Cache Settings / Options:
    - More users: Active
- Site-Name: JADE-HS - Collaboration Cloud (or short: JADE-HS - CC)
- Drive: W:\

After successful configuration you still need to license the Webdrive:

- In the list mentioned above, you will find the file Lizenz.txt. Copy its serial number
- Within the Webdrive-Client, select
  - App-Settings / General / License Information
  - Select the button "Activate License"
  - Here, paste the serial number
