

Cumulus

The Cumulus Server is a media data base, which is accessible from all locations of the university. The computing centre provides catalogues for special fields, institutes and central institutions, if requested.

User access normally happens via the portal: <http://cumulus01.hs-woe.de/portals>

Sometimes, the Cumulus Client is more suitable. It is provided as a desktop software or can be accessed via webbrowser:

- Cumulus Desktop Client, access via software menu / download under X:\hrz-support\cumulus
- Cumulus Web Client: <http://cumulus01.hs-woe.de/cwc>

Editorial work, such as the management of pictures, is done with the Cumulus Client. It can be found in the software menu of the university computing centre. It is possible, too, to install the Cumulus Client individually on notebooks. The installation files for Windows and Mac OS are deposited under X:\HRZ-Support\Cumulus.
