

Network Infrastructure

The network infrastructure service group of the [computing centre \(HRZ\)](#) deals with all network components that form the basis for all services based on it. It offers the following services:

DNS-DHCP

This service is responsible for the right naming of the devices in the network, further information you find [here](#).

HostDB

LAN - Access Network

LAN - Core Network

Monitoring

In this area, the service group is responsible for monitoring all IT services. More information can be found [here](#).

VPN

In this area, the service group is responsible for the provision and operation of the VPN infrastructure. More information can be found [here](#).

WAN

Wi-Fi

In this area, the service group is responsible for the provision and operation of the Wi-Fi infrastructure. The university computing centre offers all members of the university the use of wireless LAN (Wi-Fi / WLAN) via the eduroam infrastructure. More information can be found [here](#).

Time Service

The service is responsible for the operation of our 2 highly accurate, time-synchronized LANTIME M300 time servers from Meinberg. More information can be found [here](#).
