

Time Service

In Oldenburg and Wilhelmshaven the HRZ operates with two high-precision LANTIME M300 time servers from Meinberg, which are synchronized via GPS.

Devices that are connected to the Jade University's network via LAN (e.g. PCs)

- Devices within the [PC network system](#)
 - These devices are automatically synchronized with the correct time and therefore do not need to be configured.
- Devices outside the [PC network system](#)
 - These devices please use one of the following time servers:
 - time-els.hs-woe.de
 - time-ol.hs-woe.de
 - time-whv.hs-woe.de

These servers can only be used within the three study locations using the NTP protocol.

Devices that are connected to the Jade University network via WiFi (e.g. notebooks)

- These devices please use the time server
 - time.jade-hs.de

This server can also be used outside the university using the NTP protocol.

Note: For security reasons, access to external time synchronization sources is blocked within the Jade University.
