

Certificates

The University Computer Center offers a Public Key Infrastructure (PKI) in cooperation with the DFN-Verein: **GÉANT-TCS** (GÉANT Trusted Certificate Service) is a PKI service that the DFN-Verein obtains via **GÉANT** - this realizes the service with the help of external providers who are found through regular tenders. The current service provider is **HARICA**

- **GÉANT-TCS - HARICA**
 - Provider: Hellenic Academic & Research Institutions Certification Authority
 - Issue period: **since 2025-01**
- **GÉANT-TCS - SCM**
 - Provider: Sectigo Limited
 - Exhibition period: **2021-10 - 2025-01**

The Trusted Certificate Services enable the following services by issuing digital certificates:

- **User Certificates:**
 - Signing and encryption of files and documents
 - Signing and encryption of e-mails
- **Server certificates:**
 - Tap-proof network connections via SSL/TLS

In the architecture of a PKI, there are one or more digital certificate authorities (CAs) that issue digital certificates. These certification authorities must be known to the operating system and/or the software used so that the validity of a digital certificate can be checked.

- The first step is therefore to check whether these certification authorities are already present in the operating system / in the software to be used.
- The second step is to apply for and use a digital certificate.

Certification authorities

The control and, if necessary, integration of the certification authorities into the operating system / the software used is described in the subsection [certification authorities](#).

User certificates

[University members](#) - with the exception of students - can obtain digital user certificates according to the [X.509](#) standard. The application process is described in the subsection [User certificates](#).

Server certificates

[University members](#) - with the exception of students - can obtain digital server certificates according to the [X.509](#) standard. The application process is described in the subsection [server certificates](#).
