

Deck

Description

Deck is a kanban style organisation tool, which is aimed at personal planning and project organisation for teams integrated with Nextcloud.

- Add your tasks to cards and put them in order
- Write down additional notes in markdown
- Assign labels for even better organisation
- Share with your team, friends or family
- Get your project organised

Access

Web

Using a web browser, university members can access the Deck Organization Tool in the Jade University's collaboration cloud at <https://ccs.jade-hs.de>. After activating the "Deck" app under Settings / App order, you will find it in the top menu bar.

Smartphone-App

- Apple iOS - Apple App Store: No App known
- Google Android
 - F-Droid App Store: [Nextcloud Deck](#)
 - Google Play Store: [Nextcloud Deck](#) (fee required)

Use

The Web-App "Deck" works with Boards, lists and cards. They can be easily shifted in your position via Drag'n Drop, to adjust them to the changing requirements.

Boards

The Boards represent the **Theme / Topic / Service**. In the Board-Details you can set up the following features:

Share: Here you set up the users and groups.

This is how to entitle them:

- can edit: The users/groups can create cards and edit them
- can share: The users and groups can share the Board with others
- can maintain: The users and groups can maintain the Board with all its features

Furthermore, the Board can be added to the project.

Catchwords: Here you can edit, delete and create catchwords for the Board.

Standardly the following catchwords are available for all Boards:

- Completed
- Action required
- Later
- to examine

deleted objects: Here you find deleted lists and cards.

Lists

The lists represent a **subtopic** of the Board and is used for the alignment.

Cards

On the cards, the actual **tasks** of a section are written. In the features you can set up the following things:

Details:

- Catchword: Here you set up the stage of the tasks
- User assignment: Here you determine who is doing the task.
- termination date: date where the task should be completed

Furthermore, the task can be allocated to a project. In the description field, useful information can be held, for all users.

Attachments:

Here you can upload related data to the task.

Comments:

Here you can set up comments to the task.
