

WebFiler

With the **Web File Manager (short: WebFiler)**, university members **within and outside the campus** can access the [data drives](#) of the Jade University [network system of computers](#). This happens via a web browser and a secured and encrypted connection. The web access is thought to look into and download data.

Webbrowser

The access via **Webbrowser** is basically to consult and download data and it offers **limited comfort**. The following link leads you to the WebFiler.

[WebFiler](#)

Please log in with the [Standard Login](#) (form: ma1150).

Data-Manager

The access via **Data-Manager** via the WebDAV-protocol with the WebFiler offers a more **comfortable access**, therefore you need to configure your data-manager accordingly.

Use this access with care. WebDAV Clients does not control the "File-Locking" reliable in all cases. As a consequence, the actual document is not saved when more than one person is having access at the same time.

Apple macOS

Finder / go to / connect with server ...

- Type in the following address: <https://webfiler.jade-hs.de/HTCOMNET/hcwebdav/> in the field server address, above "preferred server".
- click on the "+" symbol, to save the location as a preferred server.
- click on "connect"
- connect as registered user
 - name: Please log in with the [Standard Login](#) (form: ma1150).
- Save the password
- The [data drives](#) X:\ and Z:\ will appear in the finder.

Linux

GNOME Nautilus (data) / other locations

- connect with server :davs://webfiler.jade-hs.de/HTCOMNET/hcwebdav/
- user name: [Standard Login](#) (form: ma1150)
- password: <your password>
- optional: dont forget password (password will be saved automatically)
- optional: add bookmark an rename in JADE-HS- PC-network system (short: JADE-HS - PC-VS)

Microsoft Windows

Given that the WebDAV-client, which is contained in the operation system Microsoft Windows, unfortunately only works quite unsoundly, you need to install and configure a WebDAV compatible software, first. This is why the university computing centre has acquired licenses for the WebDAV compatible software [WebDrive](#). You can find it in the [WebFiler](#) under

- JADE-HS - Dateien (X:) / HRZ-Support / WebDrive
- Select the folder according to your operating system
- Microsoft Windows users normally need to select the 64-bit WebDrive Client (webdrive64...exe)

After successful installation and connection of the license on your computer, please configure it in the following way:

- Type of Server: Secure WebDAV
- URL / Address: <https://webfiler.jade-hs.de/HTCOMNET/hcwebdav/>
- Username: [Standard Login](#) (form: ma1150)
- Password: Your password
- Further Settings:
 - General Settings / DAV:
 - Lock Owner-Feature: <PC-Name> <Your name> (e.g. mo2xxxx Max Mustermann)
 - Activate automatic shut of the DAV: Activated
 - File Settings/ File:
 - Activate List Note Change (unten): Cache Settings / Options
 - More Users: Activated
- Site-Name: JADE-HS - PC-Verbundsystem (short: JADE-HS - PCVS)
- Drive: Y:\

After successful configuration, you need to license WebDrive:

- With the list mentioned above, you will find the file Lizenz.txt. Copy its serial number.
- In the Webdrive-Client, select
 - App-Settings / General / License Information
 - Selec the Button „Activate License“
 - Paste the serial number
