

# Mobile devices

On mobile devices (smartphones, tablets), it is not possible to integrate a shared mailbox as an Exchange mailbox.

Here, the mailbox can „only“ be integrated as an IMAP mailbox for e-mail retrieval.

The following settings must then be made for the mailbox:

- **Inbox server (IMAP):**

- User name: persoenlicher\_benutzname@hs-woe.de/alias\_freigegebenes\_postfach
- Password: your personal password
- Server: mail.jade-hs.de
- Port: 143
- Security: STARTTLS

- **Outgoing mail server (SMTP):**

- Username: persoenlicher\_benutzname@hs-woe.de
- Password: your personal password
- Server: mail.jade-hs.de
- Port: 587
- Security: STARTTLS

## Notes

- On Apple devices, an alternative app (e.g. Spark) must be used, as Apple Mail no longer supports integration.
- Retrieval of the calendar and contacts is currently not possible
