

Siskin IM

Description

[Siskin IM](#) is an easy-used and powerful Open Source XMPP/Jabber Chat-Client for Apple iOS with the support of an OMEMO encryption.

Installation

- Apple App Store: [Siskin IM](#)

set up

With the first start of Siskin IM, you will be asked to receive push-notification and this needs to be allowed.

Jabber ID

At the beginning you need to type in your Jabber-ID in Siskin IM:

- **Sign in to an existing XMPP account** or
- **...More** (downright) / Add account / Add existing
 - **XMPP ID:** <username>@xmpp.jade-hs.de
 - **Password:** your password
 - save (above right)

Settings

The following settings needs to be done:

- **...More** (downright)
 - **ACCOUNTS**
 - Click on the created account
 - Create an **Avatar** with a taken photo
 - If required add further information.
 - save (above right)
 - **PUSH NOTIFICATIONS**
 - Enabled: activated
 - **MESSAGE ARCHIVING**
 - Enabled: activated
 - Automatic synchronization: activated
 - Synchronization: Last 14 days

- **SETTINGS**

- Chats
 - Message carbons: activated
 - Request delivery receipts: activated
 - File sharing via HTTP: activated
 - Show link previews: activated
 - Auto file download limit: 1 MB (at least)
- Contacts
 - Contacts in groups: activated
- Experimental
 - Group chat bookmarks sync: activated

Chat

In contrary to a popular messenger with XMPP/Jabber the chat partners are not automatically available, they need to be added once to the Jabber account.

- **Contacts**
- **click on this symbol (+)** above right
 - **JID**: type in the Jabber-ID of the chatpartners
 - **NAME**: shown name (e.g pre- and last name)
 - **PRESENCE**:
 - Send presence updates: activated
 - Receive presence updates: activated
 - save (above right)

After clicking on the name you can start chatting.

- With a long click on a contact, you can adjust the name.
