

Ubuntu Linux

Note: Please note that setup and printing only works within the Jade University network.

Driver

- Go to the [Utax Download Center](#)
- Select the following driver
 - Product name: 5505ci
 - Go to the card driver
 - Search for “Linux Driver” on the website and download this driver
 - Unzip the driver locally on your hard disk.
 - Open a terminal and install the corresponding package:

```
# Install printer driver
sudo dpkg -i
~/Downloads/LinuxDriver_V94_20240521/Ubuntu/EU/ta_utax_dialog_amd64/ta-utax-
dialog_9.0-0_amd64.deb
#
# The possible unfulfilled dependencies can be fixed with the following
command
sudo apt -f install
```

Installation

- Installation of these packages
 - `sudo apt install python3-smbc smbclient system-config-printer`
- Configuration of the Datei /etc/samba/smb.conf (ENG: file /etc/samba/smb.conf)
 - workgroup = HS-WOE
- Restart the device
- Drucker → Zusätzliche Druckereinstellungen (ENG: Printer → Additional printer settings)
- Hinzufügen / Netzwerkdrucker / Windows-Drucker via SAMBA (ENG: Add / Network printers / Windows printers via SAMBA)
 - SMB printer
 - `smb://ccm-qpilot-1.hs-woe.de/`
 - Auswählen ... (ENG: Select ...)
 - Legitimization:
 - Benutzername: (ENG: User name:) [default login](#) (form: ma1150)
 - Domain: HS-WOE
 - Password: <your password in the PC network system>
 - In the “SMB Browser” window, select the “QPilot” share
 - Legitimization:
 - Set legitimization details now
 - Password: <your password in the PC network system>
 - User name: [domain login](#) (form: ma1150@hs-woe.de)

- Driver:
 - Select from the database: UTAX → Kyocera 5505ci KPD (TA_UTAX/TA_5505ci.ppd)
- Installable options
 - Paper feeders: Cassettes 3,4
- Printer name: QPilot
- Description: Multifunctional devices
- Location: Campus Jade University

Print

- Within your application, click on „Drucken“ (ENG: “Print”), select the “QPilot” multifunctional device and start the printing process.
- Go to a multifunctional device, insert your CampusCard into the reader and select the document to be printed.
- Alternatively, open the website of the [InterCard user service](#)
 - Under mobilePrint you can store or upload a document to be printed
 - Under „Druckaufträge“ (ENG: „Print jobs“) you can see the print jobs you have already set up.
