

Any Connect

The University Computer Center provides university members and staff with VPN access.

Installation

Please note the information on the **VPN** main page on how to use this product.

To install the VPN client, please proceed as follows:

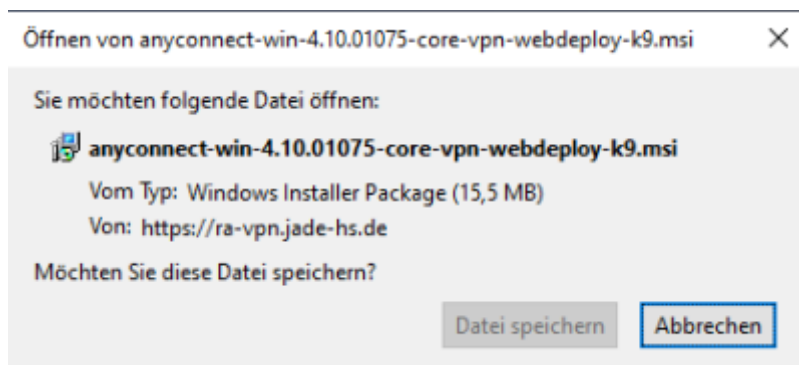

- Click on the following link: [Cisco SSL VPN Service](#).
- Log in with your long user name ([domain login](#)) (form: ab1234@hs-woe.de)
- Confirm the corresponding access profile with „Continue“

- Depending on your operating system, you can now download the client.

- Please save the installation file on your client.

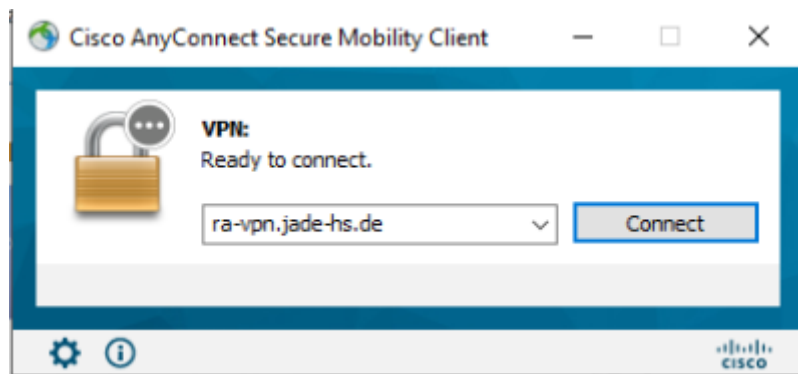

- Install the Cisco AnyConnect Client on your system, please follow the instructions of the installer

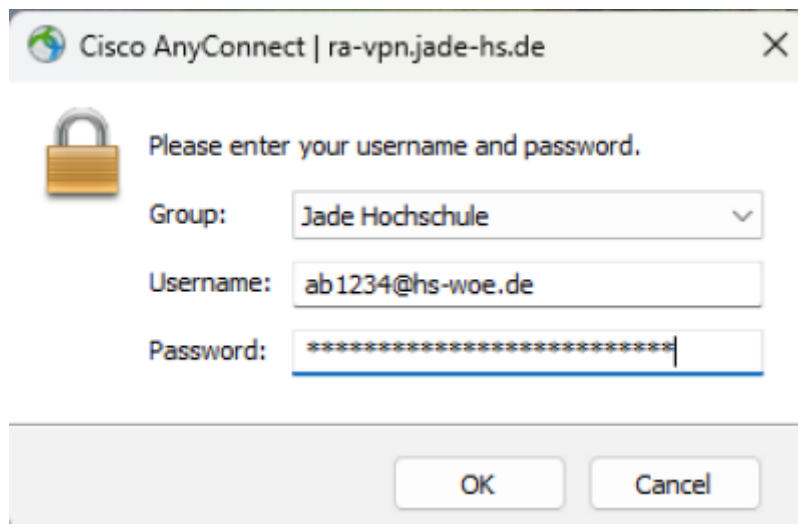

Usage

To establish a VPN connection to the university network, please proceed as follows:

- Start the Cisco AnyConnect Client on your system.
- Enter the address of the VPN server the first time you use it
 - `ra-vpn.jade-hs.de`

- Log in with your long user name ([domain login](#)) (form: ab1234@hs-woe.de)

- Click on “Accept” to confirm the access profile and to be able to use the access.

- After successfully logging in, you will find the VPN client under Microsoft Windows in the notification area of the taskbar (system tray)

- You can check the status of your connection by clicking on the VPN client icon.

- Disconnecting is also done in this way.

If you have any further questions about the VPN connection, please contact the University Computer Center via the [ticketsystem](#).
