

# eduVPN

We offer EduVPN as our VPN solution. This is a type of VPN management client that allows you to connect to our VPN solution easily and seamlessly. To use the VPN, you must download the client for your operating system; the program is available for all major systems.

## [Explanation of VPN - Virtual Private Networks \(BSI\)](#)

The user interface is similar across all systems and offers the same services regardless of the device type.

**To establish a connection, you need an MFA token (multi-factor authentication), which you can create as described in the [MFA instructions](#).**

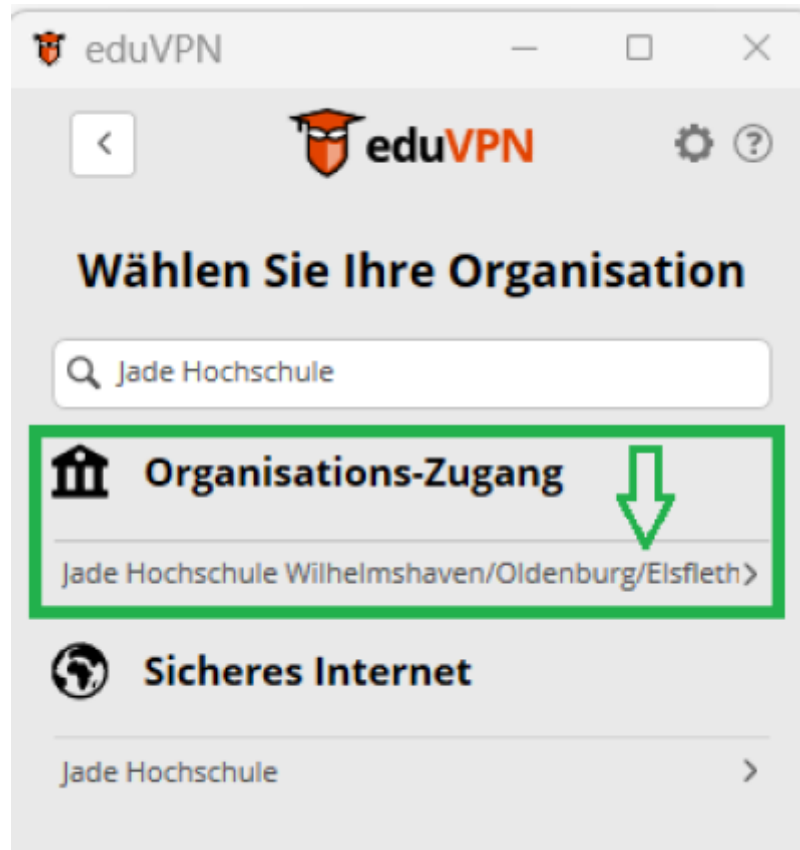

To establish a connection with the VPN, follow these steps:

### Step-by-step instructions:

- You must first set up educationMFA (multi-factor authentication): [MFA instructions](#)
- Download the eduVPN program: [EduVPN Client](#)
- Select your operating system (Windows, Apple, Linux) and download
- Install the app
- Open the app on Windows via "Start/eduVPN"

- Search for **Jade University of Applied Sciences**

- In the **Organization Access** tab, click on **Jade University of Applied Sciences Wilhelmshaven/Oldenburg/Elsfleth**
- You will be redirected to the login page
